This sounds more like your bailiwick than mine.

Subject: WV - Governor's bill on storage tank regulation

WV Governor Earl Ray Tomblin held a press conference (with Sen. Joe Manchin at his side) Monday evening to introduce his bill to begin to address the chemical spill here. Today, it is being met with criticism by Senate President Kessler and Majority Leader Unger as being "an industry bill." Thought you would want to take a look. Will send along the Senate leadership's bill shortly, which goes much further.
